SmartTap™

compact counter tap system

STYLE.FUNCTION.SUSTAINABILITY

Boiling | Chilled | Sparkling

The Quatreau **SmartTap™** is a sleek and compact counter-tap featuring illuminated buttons. It serves as the ideal water dispensing system for enhancing any kitchen, office, canteen, gym, or bar area.

The Quatreau **SmartTap™** brings you the sought-after experience of instant boiling, chilled, and sparkling water, just like its predecessor, the Quatreau Tap. **Recognized as the "Most Innovative Product of the Year" by Better Homes and Gardens**, it is a kitchen appliance that truly stands out.

Designed to withstand high-use area demands, it is the most robust and reliable multifunction tap on the market, with the lowest energy consumption and highest performing insulation. Easy to use and available with an optional drip tray for a built-in drink station.

SmartTap™ Testimonials

When designing our new kitchen, we knew we wanted something special to set it apart while adding to the function. I'm a huge fan of Sparkling water, but constantly purchasing bottles was a big expense and headache. So, I researched how to add that feature to our kitchen. That's when I found the Quatreau Smart Tap. I didn't know anyone who had one or had installed one, but the reviews were good, so we decided to give it a try.

I HIGHLY suggest that if your plumber hasn't installed one of these units before they can schedule a time to install with the GWSUSA team on the phone. The team walked our installer through the process and once it was dialed in it was working great! We now enjoy chilled filtered water and sparkling water on demand. Another added feature was instant hot water. Initially we didn't really care to have the extra feature but now that we have it we use it all the time. We even set up a hot chocolate bar next to the faucet for use during the colder months! Plus, guests are always impressed by the faucet and comment on how great it is. The price tag may seem steep but we save money by not purchasing bottle still and sparkling water while having an awesome kitchen feature that always seems to be a conversation starter!

ENHANCE YOUR WATER EXPERIENCE

G500 REVERSE OSMOSIS SYSTEM

Enhance your SmartTap™ with the **AquaWave™ G500 advanced reverse osmosis system**. It provides continuous, clean water, eliminating taste, odor, and contaminants. With a sleek design and easy maintenance, it's perfect for homes, offices, or restaurants.

AQUAWAVE CLASSIC

Elevate your SmartTap™ experience by pairing it with the AquaWave™ Classic, a space-saving reverse osmosis drinking water system specifically engineered for residential use. This compact point-of-use system utilizes a 5-stage filtration process to deliver purified water directly to your desired location. By incorporating premium components, it safeguards the RO membrane and guarantees the finest quality of water with an exceptional taste. With its sleek design and contemporary faucet, the SMART TAP™ with AquaWave™ Classic is the perfect solution for residential applications.

ONESTOP+ ANTI-SCALE SYSTEM

A comprehensive solution for safeguarding your plumbing infrastructure. This cutting-edge system offers unmatched protection against scale formation on both internal and external surfaces, ensuring the longevity and efficiency of your plumbing system. It effectively reduces the presence of heavy metals, including copper, lead, mercury, zinc, and cadmium, for enhanced water safety. Whether installed at the point of entry to your building for comprehensive treatment of hot and cold water or placed strategically before specific water-using devices like water heaters or boilers, the OneStop+™ system shields them from the detrimental effects of hard water, providing unrivaled protection and peace of mind.
